

**Auckland Masters - Ernie Haskell series 2009-2010 - after Day 2**

Qualifying runners must compete in both the EH events at three of the four meetings. Ages are taken in years, months and days, as at the day of each event. Percentages are allocated on the WMA factors (2006) for that age via the Grubb calculator (<http://www.howardgrubb.co.uk/athletics/wmalookup06.html>). This printout may not show all decimal points. The average percentage each day is taken, the winner being the qualifying runner with the highest average percentage from one of the four days.

	Age on Gideon Tait day		DAY ONE 15/11/2009					DAY TWO - 13/12/2009					Best ave %

NB: The 2006 factors used for the last few years have some differences from the old (1994) ones - not just the updating for best performances but some "unrealistic" performances were excluded before smoothing was applied.
